Q. 1 Circle the correct option i.e. A / B / C / D. Each part carries one mark.

- (i) Which of the following enzymes are **NOT** produced by bacteria?
- | | |
|----------------|------------------|
| A. Collagenase | B. Hyaluronidase |
| C. Amylase | D. Coagulase |
- (ii) Enzymes are made of _____.
- | | |
|-------------|--------------------------|
| A. Proteins | B. Carbohydrates |
| C. Lipids | D. Vitamins and minerals |
- (iii) Ciliated epithelium is found in _____.
- | | |
|------------------|----------------------|
| A. Urinary tract | B. Respiratory tract |
| C. Stomach | D. Large intestine |
- (iv) The life of normal RBC in circulation is approximately _____.
- | | |
|-----------------|--------------|
| A. Two weeks | B. One month |
| C. Three months | D. 120 days |
- (v) Which clotting factor is deficient in Haemophilia?
- | | |
|--------------|-----------------|
| A. Factor II | B. Factor VIII |
| C. Factor X | D. Calcium ions |
- (vi) At which of the following sites are the smooth muscles **NOT** found?
- | | |
|------------------|--------------------|
| A. Blood vessels | B. Small intestine |
| C. Uterus | D. Heart |
- (vii) Shock can be caused by _____.
- | | |
|---|--|
| A. Loss of fluid or blood from body | B. Chemical agents causing dilatation of blood vessels |
| C. Inadequate pumping of blood by the heart | D. All of these |
- (viii) Meninges are membranous covering of brain and spinal cords. They are made of _____ layer (s).
- | | |
|-----------|---------|
| A. Single | B. Two |
| C. Three | D. Four |
- (ix) The parathyroid glands are located in _____.
- | | |
|----------------|---------------------|
| A. Skull | B. Neck |
| C. Upper chest | D. Abdominal cavity |
- (x) Which of the following muscles **DO NOT** take part in breathing?
- | | |
|------------------------|---------------------------------------|
| A. Intercostal muscles | B. Diaphragm |
| C. Muscles of the neck | D. External muscles of the chest wall |
- (xi) What is Pneumothorax?
- | | |
|--|--|
| A. Collection of fluid in pleural cavity | B. Collection of air in pleural cavity |
| C. Collection of blood in pleural cavity | D. Over-expansion of lungs |

OPERATION THEATRE TECHNIQUES HSSC-I

9

Time allowed: 2:35 Hours

Total Marks Sections B and C: 80

NOTE: Answer any twenty-five parts from Section 'B' and any two questions from Section 'C' on the separately provided answer book. Use supplementary answer sheet i.e. Sheet-B if required. Write your answers neatly and legibly.

SECTION – B (Marks 50)

Q. 2 Answer any TWENTY-FIVE parts. The answer to each part should not exceed 2 to 4 lines. (25 x 2 = 50)

- (i) Define Microbiology. How do you classify microorganisms?
- (ii) Define oxygen requirements of bacteria.
- (iii) Name any four bacteria that produce Exotoxins.
- (iv) What is a culture medium? How do you classify culture media?
- (v) Draw a labelled diagram of Animal cell.
- (vi) What are the sites where stratified squamous epithelium is found in human body?
- (vii) What is a Gland? What are the main types of glands? Give two examples of each type.
- (viii) Describe briefly the characteristics of cardiac muscles.
- (ix) What are the different chambers of human heart? Give their names.
- (x) What is Muscle Tone?
- (xi) What are the functions of Lymph Nodes?
- (xii) Describe briefly the mechanism of Hypovolemic Shock.
- (xiii) What are the functions of Cerebral cortex?
- (xiv) Describe briefly the general structure of a long bone.
- (xv) Name the various parts of large intestine.
- (xvi) What are the functions of Gall Bladder?
- (xvii) Name any four diseases for which vaccination is available.
- (xviii) List the bones of cranium that cover the brain.
- (xix) What are the different types of joints? Give two examples for each.
- (xx) What are the functions of Testis?
- (xxi) Describe briefly the general structure of Bacteria.
- (xxii) Describe briefly the Lowenstein-Jensen medium. For which bacteria is it commonly used?
- (xxiii) Name three bacteria for each of the normal flora of skin and large intestine.
- (xxiv) What is Nosocomial infection? List the important Nosocomial infections.
- (xxv) List any four important fungal diseases in man.
- (xxvi) What are the routes of spread of Viral Hepatitis A?
- (xxvii) Write down the important features of Amoeba. What is the disease produced by amoeba?
- (xxviii) Write a short note on suction machine.
- (xxix) What are the uses of Formaldehyde?
- (xxx) What are the uses of Elli's forceps?
- (xxxi) What are the different types of non-absorbable sutures? Give examples.

SECTION – C (Marks 30)

Note: Attempt any TWO questions. All questions carry equal marks.

(2 x 15 = 30)

Q 3. Describe the structure and functions of Stomach.

Q 4. Describe gross anatomy of human heart.

Q 5. What is meant by **Disinfection** and **Sterilization**? What are the methods used for Sterilization? Describe the process of Autoclaving.
